

MICROSENS MSFET3330 amplifier

Interface electronics to drive the MSFET3330 pH sensor element

Key Features

- Small packaging
- Sensor status indication via LED
- Switch for reading the integrated temperature diode
- Analogue output

Applications

- Laboratory
- Water quality monitoring
- Environment control
- Security and industrial process control
- Benchtop setup
- MSFET 3330 Demo Kit

Characteristics

- Temperature range: 0°C ... 80°C
- Box material: Polycarbonate
- Low power consumption
